

Lionel Walden Primary School

Science Homework Challenge 2022

You are a plant scientist and your challenge is to design your own carnivorous plant that is able to catch and digest another species. Think about how your plant would attract its prey and how it will digest it. How would you care for your plant? What conditions would your plant need in order to grow healthily?

You can present your work in the form of a model, photograph, leaflet or poster. Please add labels and relevant information.

Your project should be brought to your classroom on the morning of

MONDAY 14TH MARCH

clearly marked with your name and year group.

Parents will be given the opportunity to view the projects during Science Week - further information will be circulated explaining timings.

This year, there will be prizes and certificates for each year group.

We cannot wait to see what you come up with!
